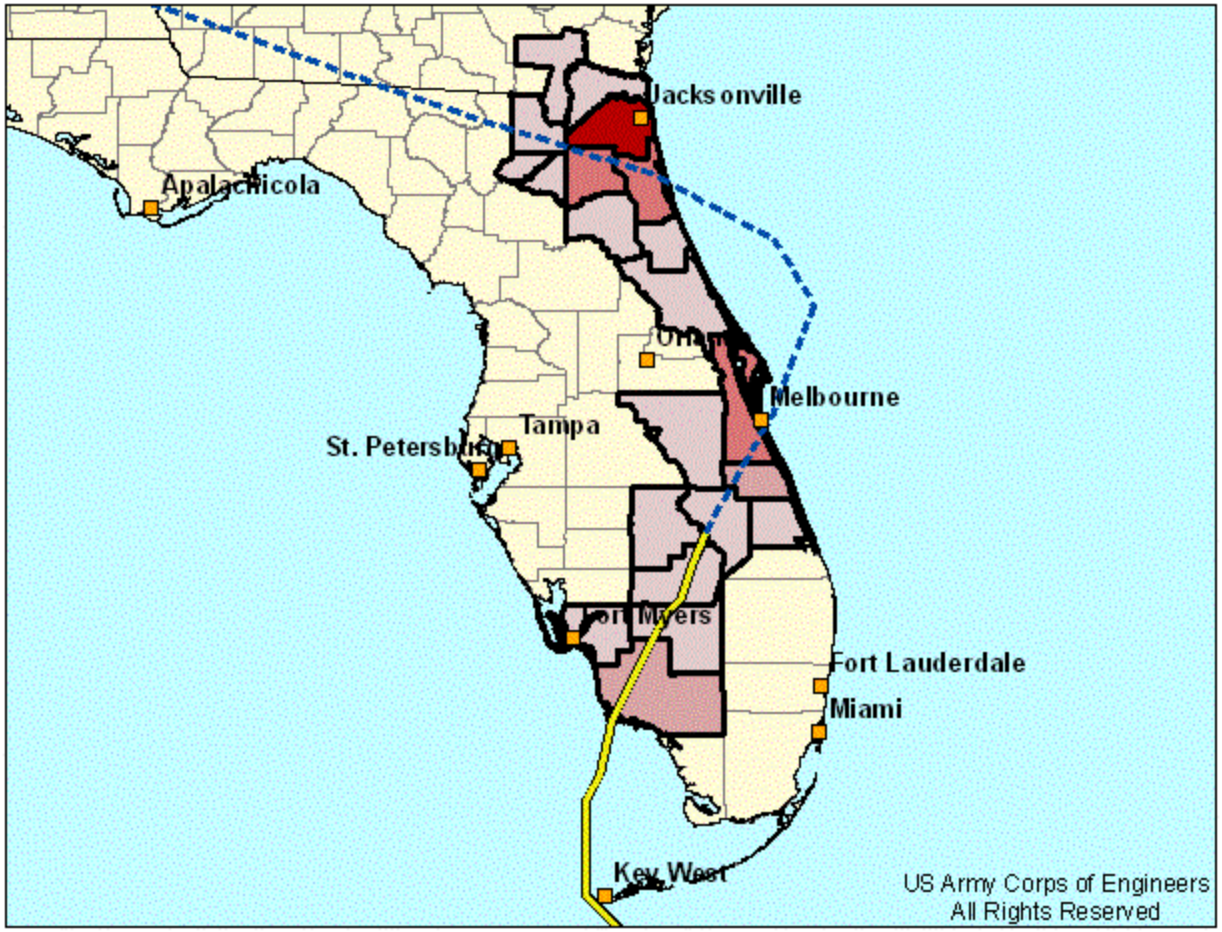
Landfall Plus About **12** Hours

For Planning Purposes Only!



Post Landfall Debris Model Results

Florida - 2,876,000 Yards

Model results per County on following page

This model is based on a Category 1 storm making landfall on SW coast, then NEcoast.

Forecast Track
Historic Track

Debris

- < 100,000 cubic yards
- 100,000 - 249,999 cubic yards
- 250,000 - 499,999 cubic yards
- 500,000 - 999,999 cubic yards
- >1,000,000 cubic yards

Information provided on this page displays a Category 1 storm making landfall on SW coast, then NEcoast. These projections are based on information from the NHC (1700 EDT 08/19/2008) forecast. The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds, but does not include volume that may be covered by private insurance. Debris volume may include storm surge generated debris.
